# PANAMERICAN GAMES LIMA 2019: NATIONAL SPORTS VILLAGE “VIDENA”

## PROJECT DESCRIPTION

The National Sports Village is, along with the National Stadium, one of the main sports venues in Peru. It is located in the district of San Luis, in the city of Lima, on a total area of 21.5 hectares. It is also called VIDENA, by the first two letters of each word that makes it up.

The National Sports Village Videna will be the main center of competitions during the Panamerican and Parapanamerican Games Lima 2019.

The works are in charge of the engineering and construction company COSAPI, which has already begun the intervention works in the different facilities, which will have a modern sports infrastructure that will be on par with the best in the world.

In the new facilities of the Videna will be held the competitions of athletics, swimming, track cycling, badminton, bowling, handball, figure skating and judo.

## PROJECT REQUIREMENTS

The project requires tile setting in the wet rooms (changing rooms) for athletics, swimming, bowling, handball and figure skating.

## SIKA SOLUTIONS

We proceeded to perform adhesion tests on the site, Sika recommended for this case **SikaCeram® Blanco Flexible**. The product behaved positively to the tests performed. The break occurred in the interface between the adhesive and the substrate, leaving the glue 100% adhered to the tile.

The **SikaCeram®** line developed a correct performance and complied with the provisions of the UNE-EN standard 1348: Determination of the tensile strength of adhesives cementitious.

Quantity SikaCeram® Blanco Flexible x 25kg: 7,338 Bags.

Metered: 21,000 m<sup>2</sup>.

Tons: 183

## PROJECT PARTICIPANTS

COSAPI, with more than 50 years in the market, is the second national capital engineering and construction company in Peru, according to the ranking of the "500 Largest Companies in Peru" published by América Economía. He has successfully completed several of the most important and emblematic projects in Peru, both in the private sector and in the public sector. Among these projects are works such as the development of the Antamina project, one of the most important mining projects developed in Peru; the construction and conservation of 1,187 and 1,975 km of roads respectively; the construction of the Jockey Plaza Shopping Center, the largest commercial center in the country in sales (as indicated by the Association of Shopping Centers of Peru); the construction of the headquarters of Banco Interbank; and the modernization of Lima's international airport. He has also developed projects in 13 countries worldwide.
